00407 UV LABEL WASH

FAST DRYING UV INK CLEANER

Application

UV roller and blanket wash, suitable for all sizes of UV Label printing presses including reel fed label, lithographic, flexography and screen units.

Benefits

Developed for all modern UV curing inks. Formulation with very low odour and fast drying. Water miscible. Leaves a non greasy residue for quick start ups.

Instructions

Add a small amount to running ink rollers and allow to cut ink film for 2-3 minutes. Strip off with press wash-up blade. For best results finish with water. Can also be used successfully manually for hand washing and all

general cleaning including flexographic plates. Can be blended with water up to 50% for maximum economy and safety. Inbuilt rubber conditioners maintain rubber suppleness and reduce durometer creep.

“Hi tech solutions for tomorrow developed today”

Fluid Technologies

Committed to excellence and distinguished by high quality innovative technology.

With a vision to revitalize the industry, its philosophies, and technologies.

Fluid Technologies has a sole focus on technologically driven fluids for the Printing Industry.

Partner with the true press chemical professionals for superior products, realistic prices and exceptional service!
