**INNOVATIVE TWO STEP POWDER TREATMENT**

REMOVES INK	✓	DESCRIPTION	RECOMMENDATIONS FOR USE
REMOVES LINT	✓	<p>Systems Kleener Powder cleans and removes ink, paper coating, mold, and calcium from the press recirculation system. This helps to ensure longer life of the fountain solution and to keep print quality consistent.</p> <p>If a build-up of ink, paper coatings or calcium occurs, then the pH and conductivity of the working fountain solution will start to change, leading to dampening related problems. Let Systems Kleener Powder do the work.</p>	<ul style="list-style-type: none"> <li>• Slowly shake Step One powder directly into dirty fountain solution tank or Pre-dissolve Step One with water and let circulate for 30 minutes.</li> </ul>
REMOVES GLAZE	✓	<p>If a build-up of ink, paper coatings or calcium occurs, then the pH and conductivity of the working fountain solution will start to change, leading to dampening related problems. Let Systems Kleener Powder do the work.</p>	<ul style="list-style-type: none"> <li>• Slowly shake Step or Pre-dissolve Step Two directly into dirty tank water. Let circulate for 10 minutes to neutralize Step One.</li> </ul>
REMOVES CALCIUM	✓	<p><b>ADVANTAGES</b></p> <p>No listed hazardous materials and easy to use.</p> <p>Simple two-step process, no need to drain dirty fountain solution until cleaning is done. Step One loosens debris and emulsifies ink residues. Step Two shocks and re-acidifies the system, reducing the possibility of contamination of the fresh fount with cleaning solution.</p>	<ul style="list-style-type: none"> <li>• Drain and flush system with clean water.</li> <li>• Refill with fresh fountain solution.</li> </ul>
LIME ELIMINATION	✓	<p>Eliminates the need to dismantle in order to clean the entire system. Easy to use, takes about 30-45 minutes to clean entire system.</p>	<p>One litre treats 5 – 10 litres of dirty water and 5 litres treats 20 – 40 litres of dirty water.</p>
