COLDSET WEB FOUNTAIN CONCENTRATE

FEATURES

SPEEDS UP TO 75,000 IPH

ALL PRESSES

CORROSION PROTECTION

ANTI FUNGAL PROTECTION

LOW DOSAGE

ALL DAMPENING SYSTEMS

OPERATING PH

5.1 - 5.2

Application

Premium fountain concentrate specifically developed for Coldset Web Offset. Suitable for all modern presses and dampening Systems.

Benefits

Highly effective in maintaining constant plate wetting at very high speeds. Added plate protectorates for extended impressions per plate of up to 170,000. Algae inhibitors for cleaner running.

Instructions

Flush lines with 00444 System Rinse and ensure reservoir tank and rollers are clean and degreased before set up. Replace or clean all filters if possible. Treat inking rollers with 00503 Roller Milk. For best performance commence dosage of concentrate at 2.0 % for operating conductivity of 1,000 microsiemens above base water and a running Ph of 5.1-5.2. Dosage may be increased for difficult stocks of press conditions.

age of concentrate at 2.0 % for operating conductivity of 1,000 microsiemens above base water and a running Ph of 5.1-5.2. Dosage may be increased for difficult stocks of press conditions.
