ANTI-CORROSION AGENTS

Description

Alcomi 3368 IPA Free Fountain Solution is a premium fount to be used with all large high-speed Heat-set webs. Contains powerful new wetting agents to ensure good water/ink balance during longer print runs.

Calcium suppressants treat the incoming water and reduce roller contamination.

New high tech wetting agents have allowed us to formulate Alcomi 3368 totally solvent free unlike similar popular fountain solutions.

Alcomi 3368 offers excellent plate protection for all CtP plates during running and stop-pages,

Advantages:

- Reduces surface tension
- 100% IPA free running
- Sharp dot reproduction
- Extremely fast start-ups
- Minimizes start-up paper waste

- Maintains reduced water settings
- Corrosion protectorants
- Fights calcium deposits in water
- Brighter and denser colours
- Stable buffered pH
- Excellent protection for CtP plates

Recommendations for use: Starting dosage of 4% is recommended per volume of water used with zero IPA. Dosage may be reduced at 0.25% increments if required. Alcomi 3368 can be used both manually or with automatic dosing systems. The dosage might vary depending on the local conditions.

Appearance: Liquid

Colour: Clear

Odour: No characteristic odour

Solubility: Completely soluble in water

pH of Concentrate : 4.46 (5.0-5.5 operating)
